

## Job description

<b>Job title</b>	Principal Consultant, Health Systems Financing
<b>Department</b>	Technical Department
<b>Location</b>	London, UK; Washington DC, US; Nairobi, Kenya; or Abuja, Nigeria (work permits required if not national from the country)
<b>Reporting to</b>	Technical Director
<b>Responsible for</b>	Senior Consultant, Health Systems & Financing
<b>Liaison with</b>	Options global team, other UK departments and overseas programmes
<b>Hours</b>	Full time, as per the country office standard working times
<b>Type of contract</b>	Permanent
<b>About Options</b>	
<p>We are a global team of experts and innovators tackling some of the world's most pressing health challenges. We work with leaders and change makers around the globe to bring health strategies to life. We provide ideas, advice and technical know-how that enable our partners to build a path to lasting change.</p> <p>With 30 years' experience in global health, we collaborate with our partners to explore existing evidence, combine expertise, scale up ideas and co-create solutions that accelerate change. This includes collaborating on policy design, managing initiatives, building powerful coalitions and galvanising social movements. Our impact is felt across whole communities, with a focus on women, girls and those who have been marginalised.</p> <p>As part of MSI Reproductive Choices, all our profits go back into supporting MSI's own mission of children by choice, not chance.</p> <p>We believe in a world where everyone can access the high-quality health services they need, without financial burden.</p>	
<b>Main purpose of job</b>	
<p>The role of <b>Principle Consultant, Health Systems Financing</b> is to provide technical support on health financing and systems strengthening across Options' portfolio of programmes in low- and middle-income countries (LMICs). The post-holder will be able to appreciate the complexities of and dynamic interactions within health systems including the political context in which they function. Through a combination of backstopping support to programme teams and direct technical delivery, they will support the design, implementation and monitoring of health financing approaches to support achievement of universal health coverage. This may include, for example:</p>	

- Technical support and advocacy for domestic resource mobilisation for health in the context of transition. This could include tracking of national and sub-national budgets, support to prioritisation and the development of country-specific evidence briefs to be used to advocate for increased investment in health.
- Technical support to strengthen public financial management (PFM) processes within the health sector to align with the country's health financing objectives. This could include support to identify and address blockages in the PFM system to ensure allocation and expenditure of budgets in line with stated priorities.
- Technical assistance to governments as they design and implement health financing reforms, with a particular focus on resilience and primary health care centred universal health coverage. This could include the design and application of diagnostic tools and convening of key stakeholders to build consensus on strategies to address local priorities.

The post-holder will have experience and technical expertise in some or all of the following areas: health financing policy or strategy development, budgeting and planning, health budget advocacy, domestic resource mobilisation; political economy analysis, sustainability and transition; public financial management, costing and efficiency analysis; results based financing; social and financial risk protection; strategic purchasing; design and/or operationalisation of insurance schemes; impact modelling or health economics.

Bringing thought leadership on health systems financing, they will contribute actively to the growth and development of the organisation and to the delivery of its strategy by contributing to generation of new business opportunities.

This post can be based in the UK, US, Kenya or Nigeria. Applicants must be eligible to live and work in one of these countries and be fluent in spoken and written English. Ability to work in French is desirable. Overseas travel may be required, as agreed with the line manager.

***Note:** All levels of position in the organisation assume some degree of responsibility for safeguarding. Your accountabilities will align with the level and scope of the position and appropriate training will be provided.*

## **Main duties**

### **Technical Assistance to Programmes**

- As part of the Technical Department, provide backstopping and strategic support on health systems financing across a selection of Options programmes through the provision of technical advice, analysis and quality assurance of technical resources.
- Undertake technical assistance assignments in health systems strengthening and health financing as well as other areas of specialist expertise such as public financial management and health economics as relevant. This will be through on-going inputs to long term programmes and one-off assignments.

- Contribute to the development of project results frameworks, theories of change and support their use and adaptation for effective programme delivery.
- Provide technical support and skills development to country stakeholders including programme staff, government officials and civil society organisations.
- Engage with national governments and other stakeholders to solicit feedback and redress areas of concern
- Liaise with donors and other external development partners to ensure programmes meet objectives and expectations
- Advise on areas of potential risk and support the development of mitigation strategies

## **Proposal Development, communication and dissemination**

- Lead the technical design and development of proposals, especially relating to health systems strengthening and health financing
- Provide oversight and inputs into technical components of proposals being developed by other members of the Technical Department

## **Prospecting for new business**

- Identify and develop new programme opportunities, building on technical expertise and geographic knowledge
- Build and maintain networks of donors, partners and influencers and use these to promote Options' work and to attract new business
- Utilise opportunities to represent Options effectively and help position Options as a thought leader in health systems financing

## **Organisational learning**

- Provide strategic support to Options' London team, overseas teams and consultants as required in relation to health systems financing
- Enable technical exchange and learning between programme staff by convening virtual or in-person events and proactively sharing learning resources and tools and connecting individuals from across the organisation.
- Contribute to the documentation of results and the publication and dissemination of research and learning

## **Management**

- Manage project consultants, Technical Advisors, Technical Officers or interns as required
- Through support and guidance to existing staff, help to grow Options' expertise in health systems financing

## **Training**

- Increase and maintain your own area of expertise through continuous self-development.
- Participate in relevant external training and capacity building undertaken by Options.

Note: this job description reflects the present requirements of the post. As duties and responsibilities change and develop the job description will be reviewed and be subject to amendment in consultation with the job holder.
